Planned country specific search forms with supported fields 3

Search for Documents (under discussion)

Form Label	XSD Name	German Expression
Court ID	CourtID	Gerichtsnummer
Court file number	CourtFileNumber	Tagebuchzahl

LRI e-Justice Portal structure

Use cases

- > What are the main use cases intended beside finding properties of a deceased person?
 - How can they be fully supported by the different LR because of legal restrictions or inapplicable data model?

Country specific features

- > Where will descriptions for special “search behaviour” for certain LRs be available?

LRI e-Justice Portal web-interface

Input forms – common user experience

- > Discussion about certain fields like person id in “Search for properties (step 2 - All countries)”?
- > Which validations in forms (i.e. before the request is sent) are planned or possible?
- > Handling of error codes, corresponding messages and necessary translations
- > Algorithms/restrictions for person search (e.g. allowance of wild cards, phonetic search)

LRI Requests/Responses

- > Discussion about missing or not supported parameters (e.g. middle name)
- > Support of different user roles in the request?
- > Is payment structure in request sufficient?

Documentation for WP2

Purpose of the document

- > Who will read/use this document?
 - Discussion about structure and sequence according to the future recipients (e.g. results as starting chapters and analysis later in the document)?

Structure and content

- > Discussion of common chapters and reuse of documents already published (i.e. just references to other documents)
